# ENERGY

# STREAMLINING PERMITTING

Thinking about energy policy, please tell me if you would support or oppose the following policy:

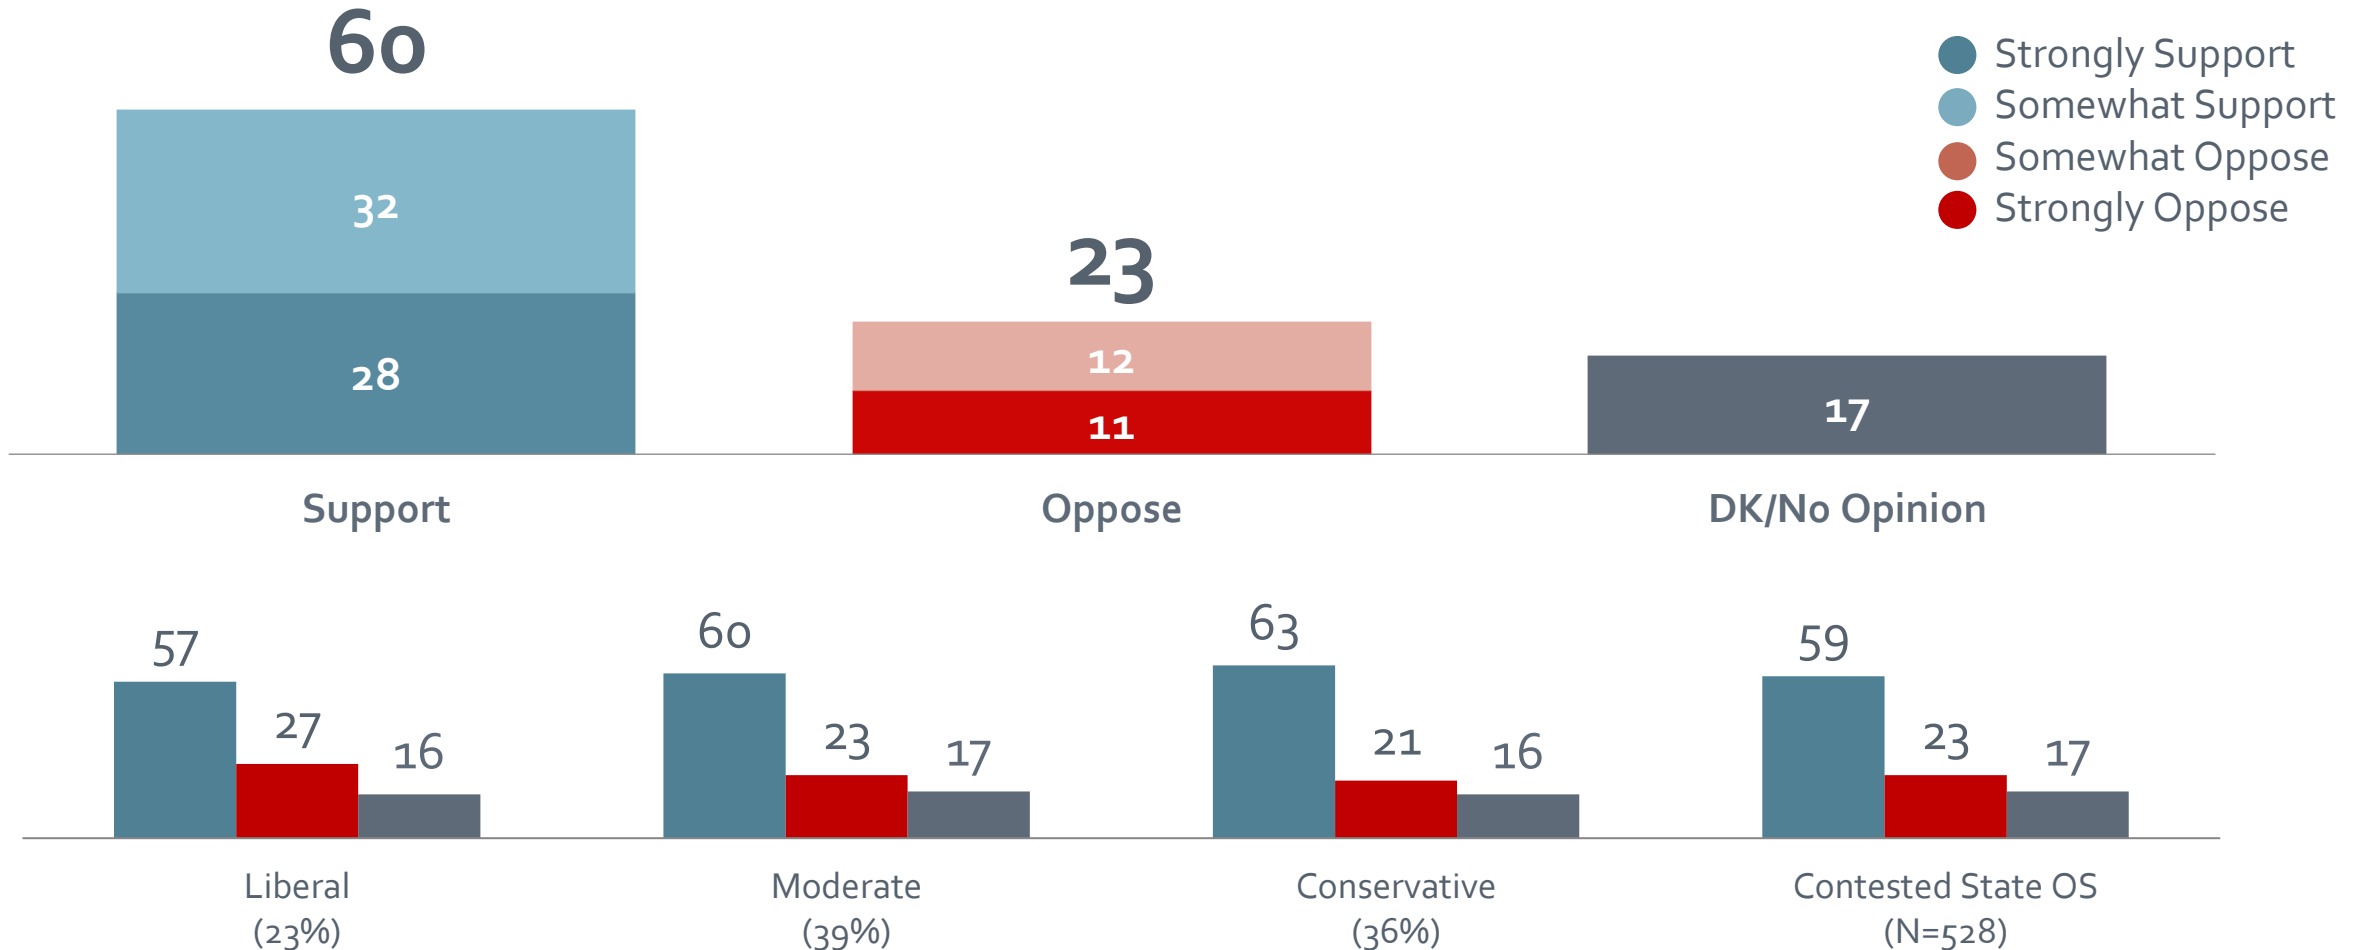

“Streamlining the permitting process for domestic energy projects so that we can increase our own production and exportation of American energy resources.”

# INCREASING NUCLEAR

Thinking about energy policy, please tell me if you would support or oppose the following policy:

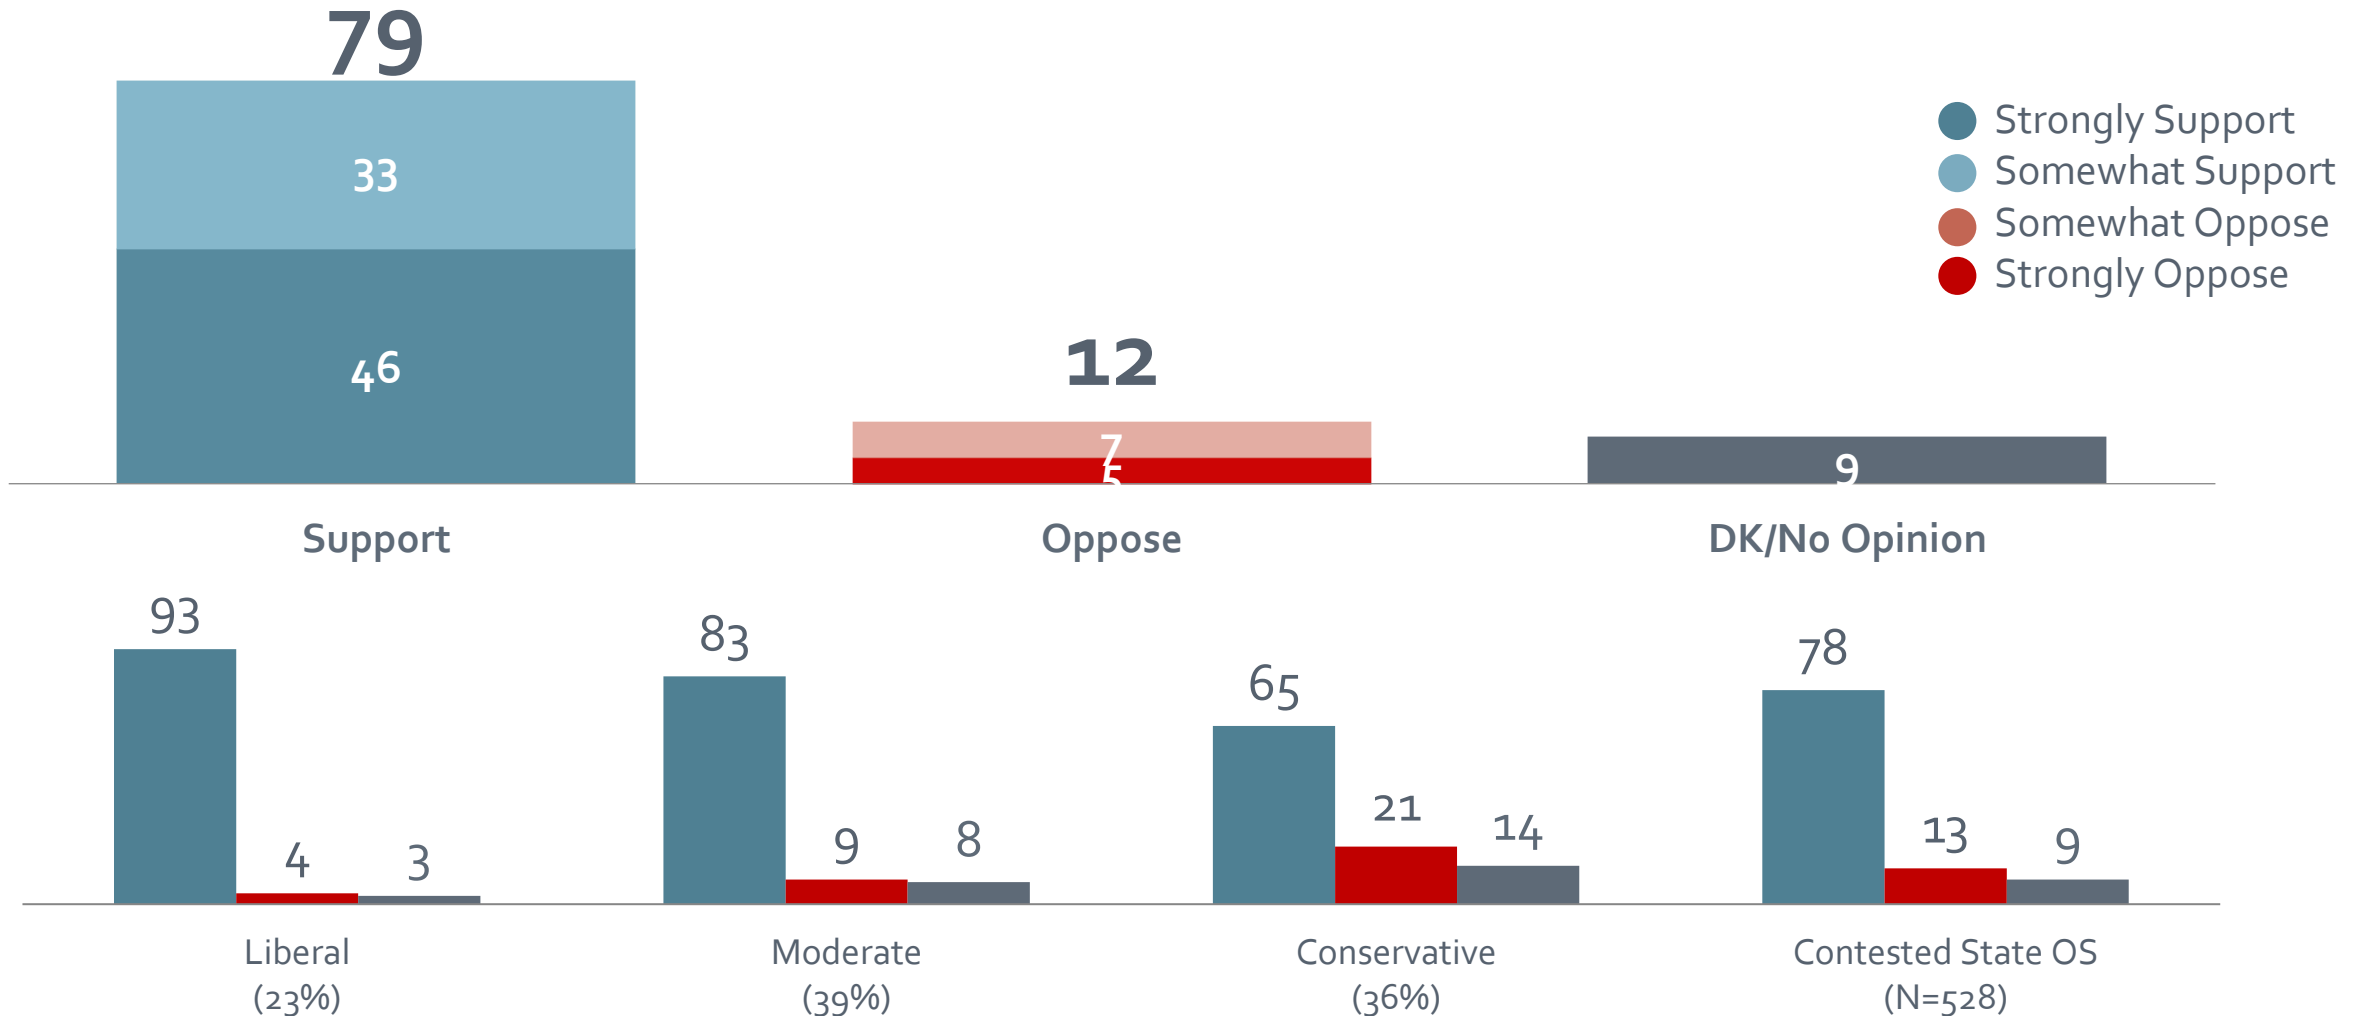

“Increasing domestic production of nuclear energy.”

# INCREASING RENEWABLES

Thinking about energy policy, please tell me if you would support or oppose the following policy:

“Increasing production of renewable energy.”

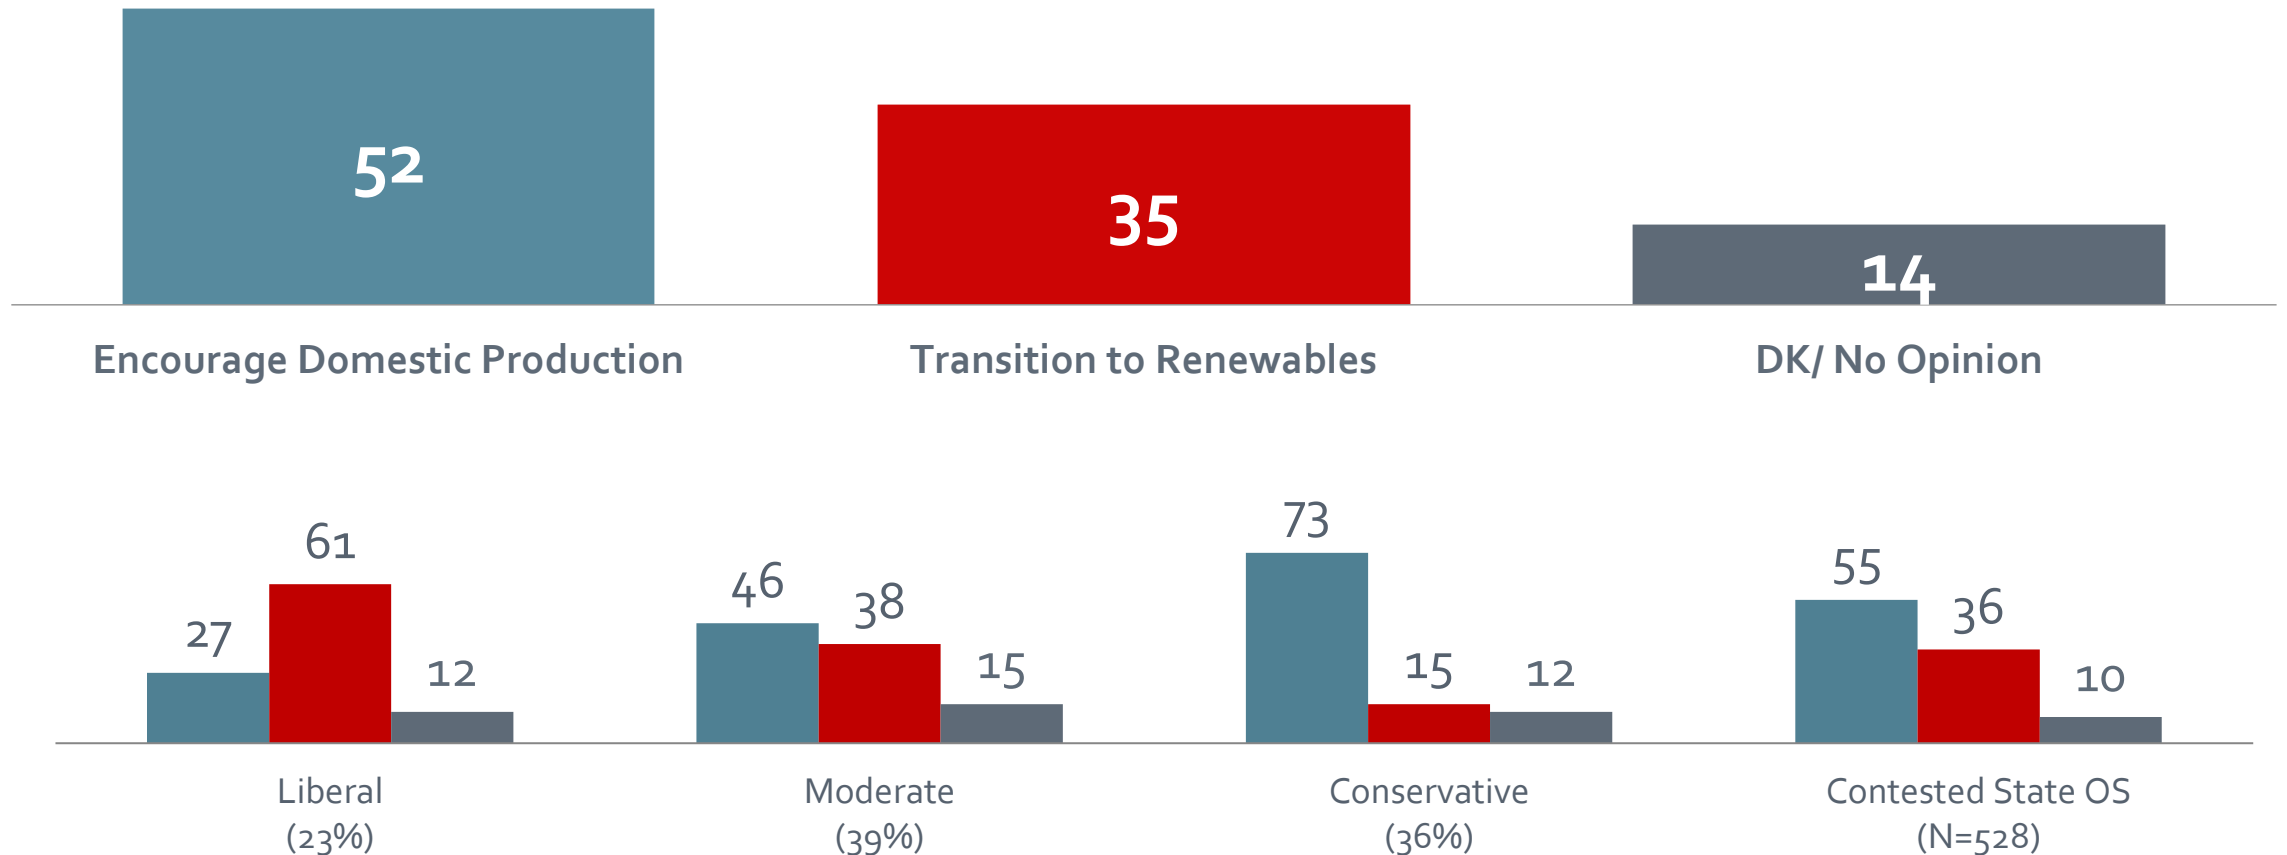

Thinking about domestic energy production, which of the following statements comes closest to your opinion?

Some say that the U.S. produces the cleanest energy in the world. They say we should encourage more domestic natural gas and nuclear energy production to make our country and our allies less dependent on energy from foreign adversaries.

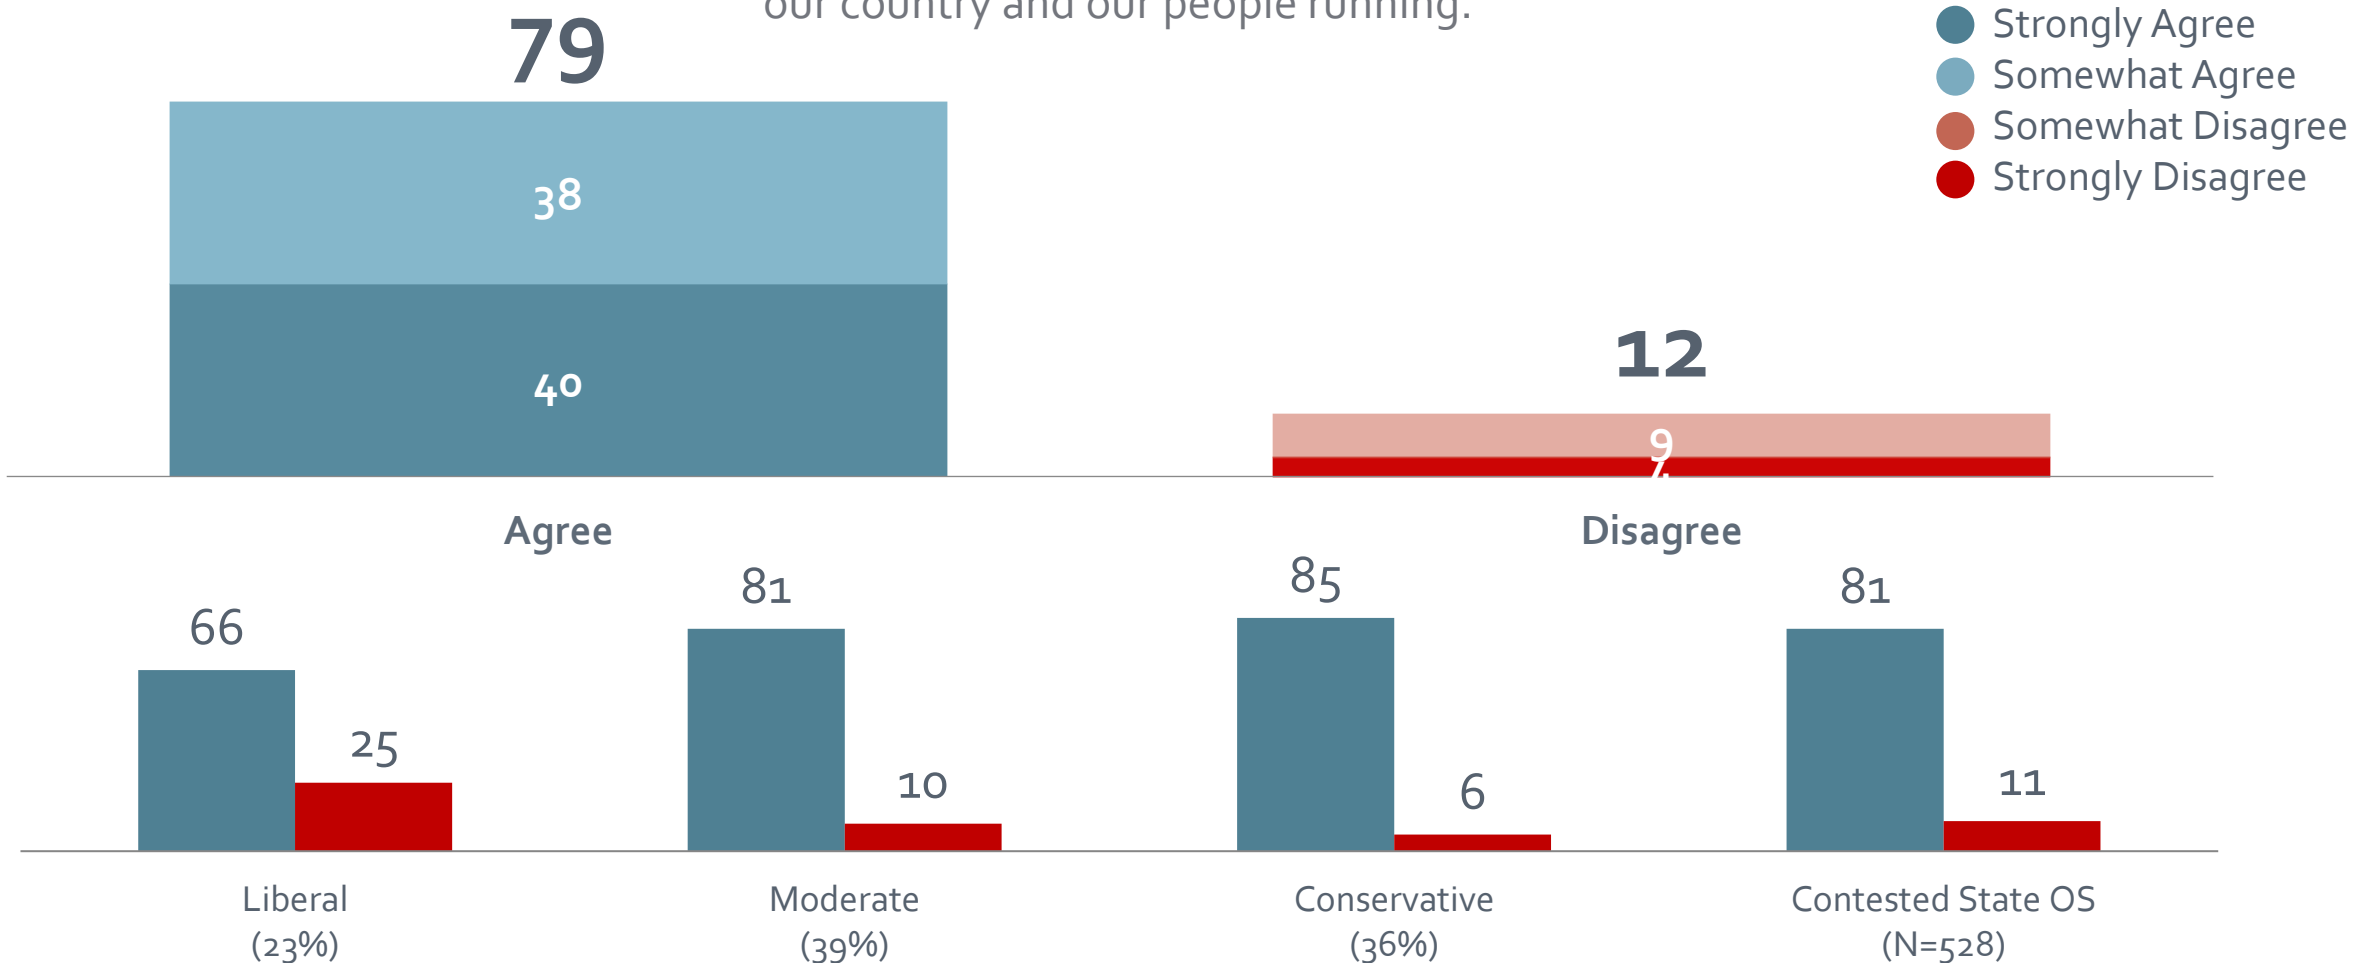

Others say the U.S. needs to move away from fossil fuels all together in efforts to fight climate change and transition to renewable energy.

# ALL OF THE ABOVE APPROACH

Please tell me if you agree or disagree with the following statement.

“Millions of Americans rely on domestic energy for affordable transportation, heating, and electricity. As we invest more in renewable energies, we must also protect and strengthen the natural gas and nuclear industries that keep our country and our people running.”
